

AI Model Deployment Report

Name: Adama

Batch Code: LISUM45

Submission Date: 2025-05-28

Submitted to: Data Glacier internship week 4

Step 1: Model Training Output

```
Collecting six>=1.5
  Downloading six-1.17.0-py2.py3-none-any.whl (11 kB)
Installing collected packages: pytz, tzdata, threadpoolctl, six, numpy, markupsa
fe, joblib, itsdangerous, click, blinker, werkzeug, scipy, python-dateutil, jinja
a2, scikit-learn, pandas, flask
Successfully installed blinker-1.9.0 click-8.2.1 flask-3.1.1 itsdangerous-2.2.0
jinja2-3.1.6 joblib-1.5.1 markupsafe-3.0.2 numpy-2.2.6 pandas-2.2.3 python-dateu
til-2.9.0.post0 pytz-2025.2 scikit-learn-1.6.1 scipy-1.15.3 six-1.17.0 threadpoo
lctl-3.6.0 tzdata-2025.2 werkzeug-3.1.3

[notice] A new release of pip is available: 23.0.1 -> 25.1.1
[notice] To update, run: pip install --upgrade pip
(venv) keyfa/python train.py
Model trained and saved!
(venv) keyfa/
```

Step 2: Flask Server Running

Iris Classifier

Sepal Length:

Sepal Width:

Petal Length:

Petal Width:

Predict

Step 3: Web Application

```
(venv) keyfa/python app.py
* Serving Flask app 'app'
* Debug mode: on
WARNING: This is a development server.
Use a production WSGI server instead.
* Running on http://127.0.0.1:5000
Press CTRL+C to quit
* Restarting with stat
* Debugger is active!
* Debugger PIN: 122-472-381
```

Step 4: Prediction Result

Predicted class: 2

Step 4: Prediction Result

Step 4: Prediction Result

Success

Successfully initiated launch of instance (i-035688541578996be)

Launch log

Next Steps

What would you like to do next with this instance, for example "create alarm" or "create backup"

Create billing and free tier usage alerts

To manage costs and avoid surprise bills, set up email notifications for billing and free tier usage thresholds.

Create billing alerts

Connect to your instance

Once your instance is running, log into it from your local computer.

Connect to instance

Learn more

Connect an RDS database

Configure the connection between an EC2 instance and a database to allow traffic flow between them.

Connect an RDS database

Create a new RDS database

Learn more

Create EBS snapshot policy

Create a policy that automates the creation, retention, and deletion of EBS snapshots

Create EBS snapshot policy

Manage detailed monitoring

Enable or disable detailed monitoring for the instance. If you enable detailed monitoring, the Amazon EC2 console displays monitoring graphs with a 1-minute period.

Manage detailed monitoring

Create Load Balancer

Create an application, network gateway or classic Elastic Load Balancer

Create Load Balancer

Create AWS budget

AWS Budgets allows you to create budgets, forecast spend, and take action on your costs and usage from a single location.

Create AWS budget

Manage CloudWatch alarms

Create or update Amazon CloudWatch alarms for the instance.

Manage CloudWatch alarms

Disaster recovery for your instances

Recover the instances you just launched into a different Availability Zone or a different Region using AWS Elastic Disaster Recovery (EDR).

Disaster recovery for your instances

Monitor for suspicious runtime activities

Amazon GuardDuty enables you to continuously monitor for malicious runtime activity and unauthorized behavior, with near real-time visibility into on-host activities occurring across your Amazon EC2 workloads.

Monitor for suspicious runtime

Get instance screenshot

Capture a screenshot from the instance and view it as an image. This is useful for troubleshooting an unreachable instance.

Get instance screenshot

Get system log

View the instance's system log to troubleshoot issues.

Get system log
